Line Post with notch system

VITICULTURE

Accessories

Plastic Clips

Removable hooks for synthetic moving wires.

Spreader

Adapted to the post. The spreader allows you to keep the moving wires in a lower position when the vines are dormant. Save time during lifting.

Post cap

Adapted to the post. It protects the top of the post when pressing in.

Recommandations d'utilisation

When installing posts with a post driver, make sure to use the appropriate post cap.
In order to guarantee optimal support, the recommended installation depth is 1/3 length of the post.
For line posts, the profile opening should always be facing the slope.
Recommended maximum interspacing : 5m.
For high acidity soils, ZAM coating is recommended.

Notes
