New Bracket "SAFE"

Benefits of the new Kit Safe T.Bar SLPA®

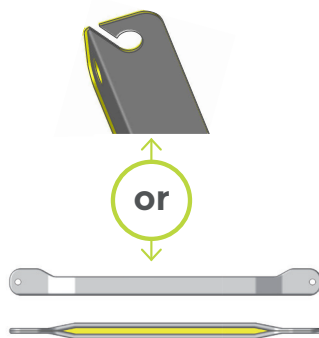

- An open profile at the top of the bracket to prevent wasps from nesting there.
- Greater safety for operators during installation and harvesting.
- Reverse bending of the steel brackets reinforces the rigidity of the catch wires (angle by request).

Kit including Brackets and support bars with customizable features. Made-to-measure manufacturing and drilling to adapt to different types of tree crops and all types of posts available (metal, wood, concrete, etc.).

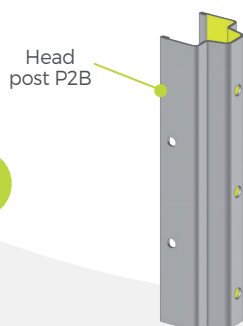

1 - Make-up the bracket :

length	By request
Dimensions	50 X 40 or 62 X 55 (end-of-row bracket)
